Carry your medical history wherever you go

MIC

Med-InfoChip™

The PRODUCT

The MIC is an innovative product that allows a person to organize, carry and maintain their personal medical history at all times. Designed to be attached to a keychain or worn around the neck, this lightweight, password protected 'plug and play' device inserts into a USB port on any computer for easy access by a patient, physician or emergency responder. MIC works with both Windows and Mac operating systems.

Insert MIC into any USB computer port to view your data: compatible with Windows and Mac.

BENEFITS

- Life-saving information in emergency situations.
- Password protected data with "read only" feature for emergency access.
- PC and Mac compatible.
- Developed in four languages: English, German, Spanish, and French. One click allows you to navigate between all four languages from anywhere within the program.
- Self contained program fully controlled by user.
- Versions are available for individuals (1 profile), couples (2 profiles on one chip) and families (5 profiles on one chip).
- No annual fees.

MEDICAL HISTORY

The digitized chip contains important information including:

- Allergies
- Diseases
- Lab reports
- Medications
- Insurance Information
- Immunizations
- Emergency Contacts
- Past Medical Procedures
- Family Medical History and more...

The storage capacity of the MIC also allows users to insert graphical items, such as photos, X rays, EKGs, passports, and birth certificates.

TARGET AUDIENCES

The MIC is now available for sales and distribution in Europe. This innovative product is applicable across numerous target audiences including but not limited to the following:

- Newborns
- Infants
- Children
- Adolescents
- Adults
